

TRUSTED SOLUTIONS AND INNOVATION

AERIAL & DIE MOUNT CAMS CATALOG

SERVICE WE DELIVER AND QUALITY YOU CAN DEPEND ON

ITEM is a leading manufacturer of die sets and die component products supplied globally to the parts forming industry. Backed by years of tool and die experience, quality and innovation are some of the reasons why our name is respected throughout the world. We have taken the lead role in creating and bringing new products to customers and helping them find solutions that improve their operations. Based on the capabilities **ITEM** offers, we can help you to meet the demands of quick deliveries, technical support, quality products and competitive prices. **ITEM** and its' broad distribution channels and direct sales personnel will assist you in any way to make your product a better and more profitable one.

Whether standard or customized products, with our years of experience, customers can be sure the products they receive will meet their expectations for reliability and dependable performance. We understand the demanding schedules of die builders and production personnel and have developed efficient manufacturing processes to shorten product lead times as well as put inventory on our shelves so you can have it in your facility when you need it. Put the **ITEM** network to work for you. We've got the service you've been looking for.

Included in our full line offering are both inch and metric size die sets and die components that are designed to numerous die standards including ISO, NAAMS, JIS and many large automotive and appliance manufacturers' standards. The complete product offering includes:

- Accu-Bend™ Rotary Benders
- Air Presses
- Cams
 - Aerial and Diemount Cams
 - Box Cams
 - Roller Cams
 - Wide Cams
- Die Accessories
- Die Sets
 - Plain and Ball Bearing Sets
 - Catalog Ball Bearing Sets
 - Wear Plate Sets
 - Cast Sets
- Ejector Boxes
- Guide Posts and Bushings
 - Plain and Ball Bearing Styles
 - Steel, Bronze, Bronze-Plated and Self-Lubricating Bushings
 - Lempoloy® Bushings
 - Special Pins, Bushings and Retainers
- Hydraulics
 - Electronic Die Setters
 - Die Separators
 - Drill and Tap Equipment
 - Hydraulic Motors
- In-Die Tapping Units
- Machined and Cut Ground Plate
 - Adapter Plates
 - Bolster Plates
 - 1020, 1045 & 4140 Materials
- Manufacturing Services
 - CNC Machining
 - Blanchard Grinding
 - Stress Relieving
 - Die Set Repair
- Mold Components
 - Bronze-Plated and Self-Lubricated Bushings
 - Leader Pins
 - Bronze and Bronze-Plated Wear Strips and Ways
- Punches, Buttons & Retainers
- Reliance Fabrications
 - Custom Fabrications
 - Robotic Welding
 - Aluminum and Steel Fixture Bases
- Springs
 - DieMax™ L Inch Series Springs
 - DieMax XL™ Series ISO Springs
 - JIS Series Springs
 - Custom Heavy Duty Springs
 - Marsh Mellow® Springs
 - Formathane® Urethane
 - Kaller Gas Springs
 - Utility and Disc Springs
- Wear Products
 - Plates, Strips, Gibs and Blocks
 - Steel, Bronze, Bronze-Plated and Self-Lubricating Materials

Items in the blue shaded area are included in this catalog.

Nitrogen Return Option – Using nitrogen springs to replace the standard mechanical springs will provide more slide return force for applications involving heavier tooling mounted on the slide face. Individual return forces can be found on the specifications table for each size cam.

Positive Return – Included are mechanical return straps designed into the cam to pull the slide and tooling out of the part in case of a tooling jam. Positive return straps are designed to provide a positive return but are not designed to provide continuous stripping force.

Electronic Templates Available – Each cam has Template or Model files online for easy download into your die designs. The slide, body and driver are broken into three components for die movement simulation. The formats available are 2D/3D DWG, IGES, STEP, Parasolid, Catia, and Solidworks.

Special Cam Designs – We know there are sometimes when a standard cam doesn't fit into an application or is at the wrong angle. If you provide us with your application specifications, we will design and build a special cam for you.

Die Mount Cam*

Product Features

Every NAAMS cam provides excellent performance and is designed with heavy-duty high volume production in mind.

- ◆ Self lubricating sliding surfaces provide maintenance free operation.
- ◆ Aluminum Bronze against steel wear surfaces is standard with an option of steel on steel wear surfaces.
- ◆ Slide accelerators are added to certain angles for quiet operation & reduced wear.
- ◆ Positive return(s) on the cam slide assures slide retraction and extra protection.
- ◆ Ease of setup with home position slide lockout capabilities.
- ◆ Rear spring access for ease of maintenance.
- ◆ Quick slide removal with top access keeper plate for all die mount cams.

Aerial Cam – 50 mm

WORK ANGLE	Z
0 - 15°	147.5
20 - 60°	127.5

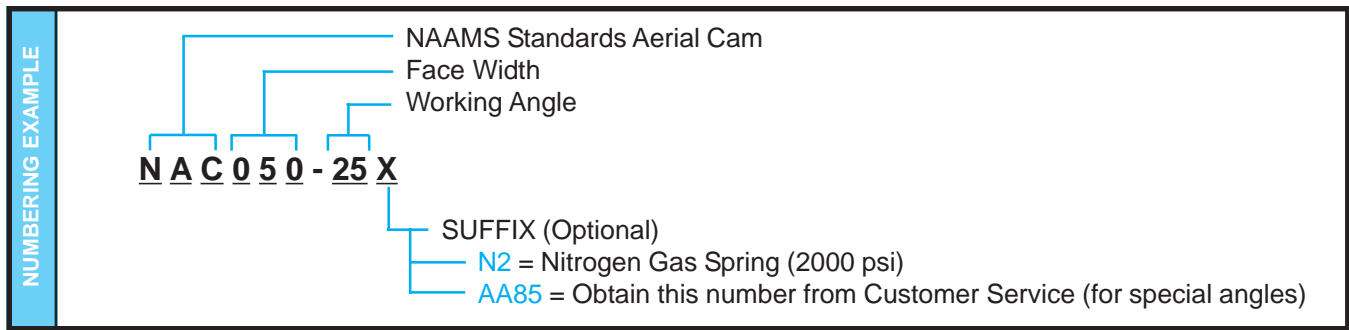

Tooling ball is not supplied
with the cam and is
a reference point only.

Ask Customer Service for design templates on our website or CD.
Picture not representative of all angles.

Tooling ball located at "A" dimension per NAAMS.
"Y" dimension represents the tooling ball from the slide centerline.
Dowel holes undersized 0.2/0.3mm.
All dimensions are for reference only.
No tolerance is stated or implied.

Notes

Long Reaching (Extra Travel) Die Mount Cams

When to use a LRD Cam

The Long Reaching (Extra Travel) Die Mount Cam line is designed to provide maximum clearance for material movement while optimizing the preferred kinematics associated with standard Die Mount Cams. The Long Reaching (Extra Travel) Die Mount Cam provides a sound alternative to the use of low angle aerial cams in transfer press operations and is part of our next generation of automotive and large die cams.

Designers will find the height and length of the 110mm travel Long Reaching (Extra Travel) Cam to be a perfect package providing 30% more slide travel than competitive cams. Take a look at the performance features and you will find it's easy to see why the Long Reaching Cam line will make everyone's job easier.

- ◆ 110mm slide travel allows unencumbered travel over part flanges
- ◆ Quick slide removal with top access keeper plate
- ◆ Side wear strip on slide for extra lubrication and ease of maintenance
- ◆ Reduce noise and wear with the optional accelerator (150 & 200 wide cams)
- ◆ Long lasting Aluminum Bronze Wear Plates against hardened steel surfaces
- ◆ Maintenance-free, self-lubricating components
- ◆ Optional, longer slide adds 35mm to reach
- ◆ Urethane bumper to cushion return
- ◆ ISO nitrogen cylinder with no pre-load
- ◆ Double protection with positive returns
- ◆ Ease of setup with slide lockout capability
- ◆ Rear spring access for ease of maintenance

Calculation of Load and Stroke

Θ_1	DRIVING ANGLE OF INCLINATION
Θ_2	WORKING ANGLE
F	FORCE REQUIRED (PIERCING/TRIMMING/FLANGING FORCE + PAD FORCE + SPRING RETURN FORCE)
P	PRESS FORCE
V	LOAD ON SLIDING SURFACE OF DRIVER
Q	LOAD ON SLIDING SURFACE OF SLIDE
S	WORKING STROKE
S₁	SPRING STROKE (SLIDE TRAVEL)
L	PRESS STROKE

$$P = F \times \frac{\cos \Theta_1}{\sin (\Theta_1 + \Theta_2)}$$

$$L = S \times \frac{\sin (\Theta_1 + \Theta_2)}{\cos \Theta_1}$$

$$Q = F \times \frac{1}{\sin (\Theta_1 + \Theta_2)}$$

$$S_1 = S \times \frac{\cos \Theta_2}{\cos \Theta_1}$$

$$V = F \times \frac{1}{\tan (\Theta_1 + \Theta_2)}$$

$$S = S \times \frac{\cos \Theta_1}{\cos \Theta_2}$$

The IEM Value Proposition

- I. **IEM** is recognized as the leader in manufacturing quality die sets and related products to the global parts forming industry. Our reputation has been built by satisfying customer needs, and we are very strong in the automotive and appliance industries.
- II. **IEM** offers outstanding delivery on a consistent basis. Choosing us as a supplier means that our customers have a competitive advantage in delivering their products to the market.
- III. **IEM** has complex machining capabilities on die sets at several strategically located facilities. Various locations means lower shipping costs and allowing **IEM** to machine complex die sets means the customer's machining centers have additional capacity.
- IV. **IEM's** vast breadth of products assures innovative solutions. We strive to address customer problems by utilizing our research and development department as well as other technical professionals.
- V. **IEM** has a technically trained sales force and distributor channels with engineering support. Sales, marketing and engineering professionals are available to support our product lines.

➤ Competitive Prices

➤ Reliability and Performance

**...A LEADING MANUFACTURER
AND INNOVATOR OF DIE SETS
AND DIE COMPONENTS
SUPPLIED GLOBALLY TO THE
METAL FORMING INDUSTRY...**

- High Quality Design & Construction
- Outstanding Service & Support
